PROGRAM-3

LAB-4

AIM:-WAP TO COUNT HOW MANY OBJECT ARE CREATE OF THE CLASS.

CODE:

```
public class lab_4_3 {  
    static int count=0;  
    lab_4_3(){  
        count++;  
        System.out.println(" count is define how many object are create "+count);  
    }  
    public static void main(String[] args) {  
        int i=10;  
        while(i>0) {  
            lab_4_3 d = new lab_4_3();  
            i--;  
        }  
    }  
}
```

} OUTPUT:

```
count is define how many object are create 1  
count is define how many object are create 2  
count is define how many object are create 3  
count is define how many object are create 4  
count is define how many object are create 5
```

```
Process finished with exit code 0
```
